

Architectural Sheet Metal

www.WesternSpecialtyContractors.com

Sheet metal is not just
for gutters and metal
roofs anymore; it can
be used in creative and
beautiful ways to provide
modern and sleek
architectural designs.

PROJECT CAPABILITIES

Western's Sheet Metal Division has 20+ years' experience and is fully equipped, experienced, and qualified to fabricate complex metal projects in a wide variety of sheet metal materials, that are LEED certified. With our in-house design capabilities, we provide quality skills and knowledge to value engineer your project, while meeting your budget and project goals. No job is too large or too small.

Gutters, Downspouts, Scuppers, Expansion Gaps & More

Interior Tenant Improvement Projects

Custom Metal Fabrications & Detailing

Forming, Shearing, Welding & Punching CNC Panel Machine

ACM/MCM WALL PANEL SYSTEMS

Western's Sheet Metal Division ensures that the **quality** of construction is professionally completed on all installations.

WHAT IS ACM/MCM?

ACM/MCM is a lightweight composite material, consisting of two aluminum cover sheets and a fire rated core.

It is a simple and versatile product which delivers a weather resistant, unbreakable and shock resistant facade which is very easy to install for our skilled craftsmen.

A wide variety of available material sizes and finishes provide an endless array of design options.

**An aesthetic
design
solution for
your building
facade**

**Quality that
will last for
years**

**Energy
efficient
upgrade for
your building**

WALL PANELS PROJECT PROFILES

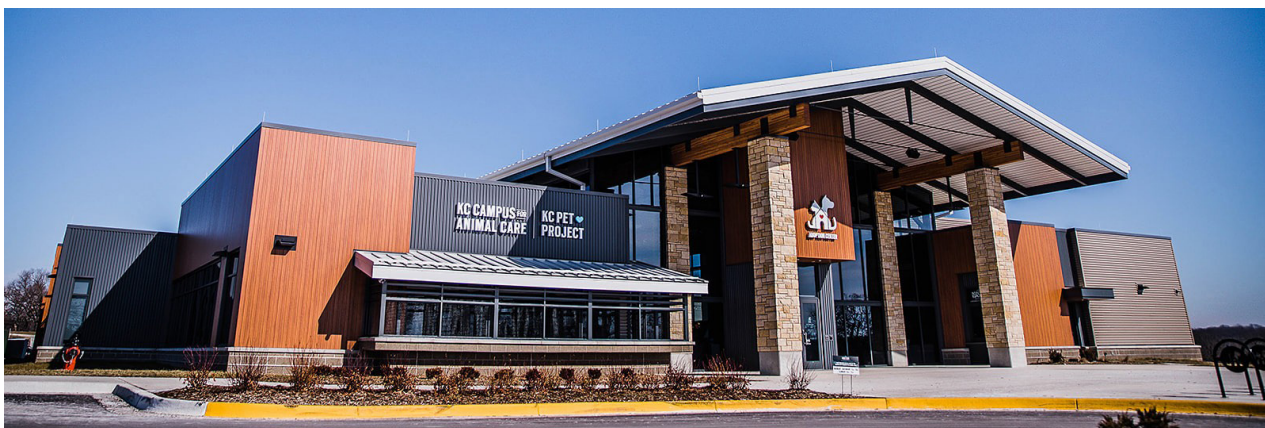

Wonderscope

Western installed a 1/8" aluminum plate wall system, including the flashings throughout. The eye-catching layout was designed by an Architect.

KC Pet Project

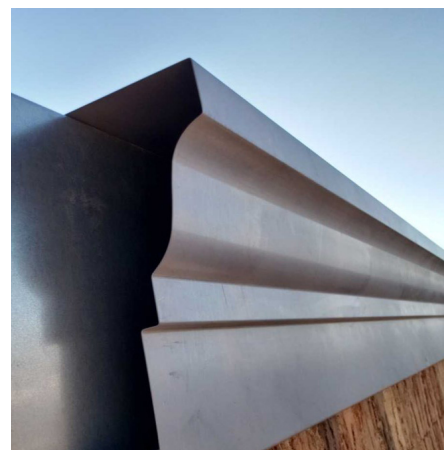

Western installed a standing seam roof, new flashings and coping, as well as single skin panels throughout the new structure.

SHEET METAL REPAIRS

Western has a dedicated crew on call to specifically help with repairs on any sheet metal facet of your building. Whether it be a broken gutter, a split downspout, a clogged scupper, or a missing piece of flashing, Western's sheet metal crew is here to ensure your building looks better than it did before we arrived.

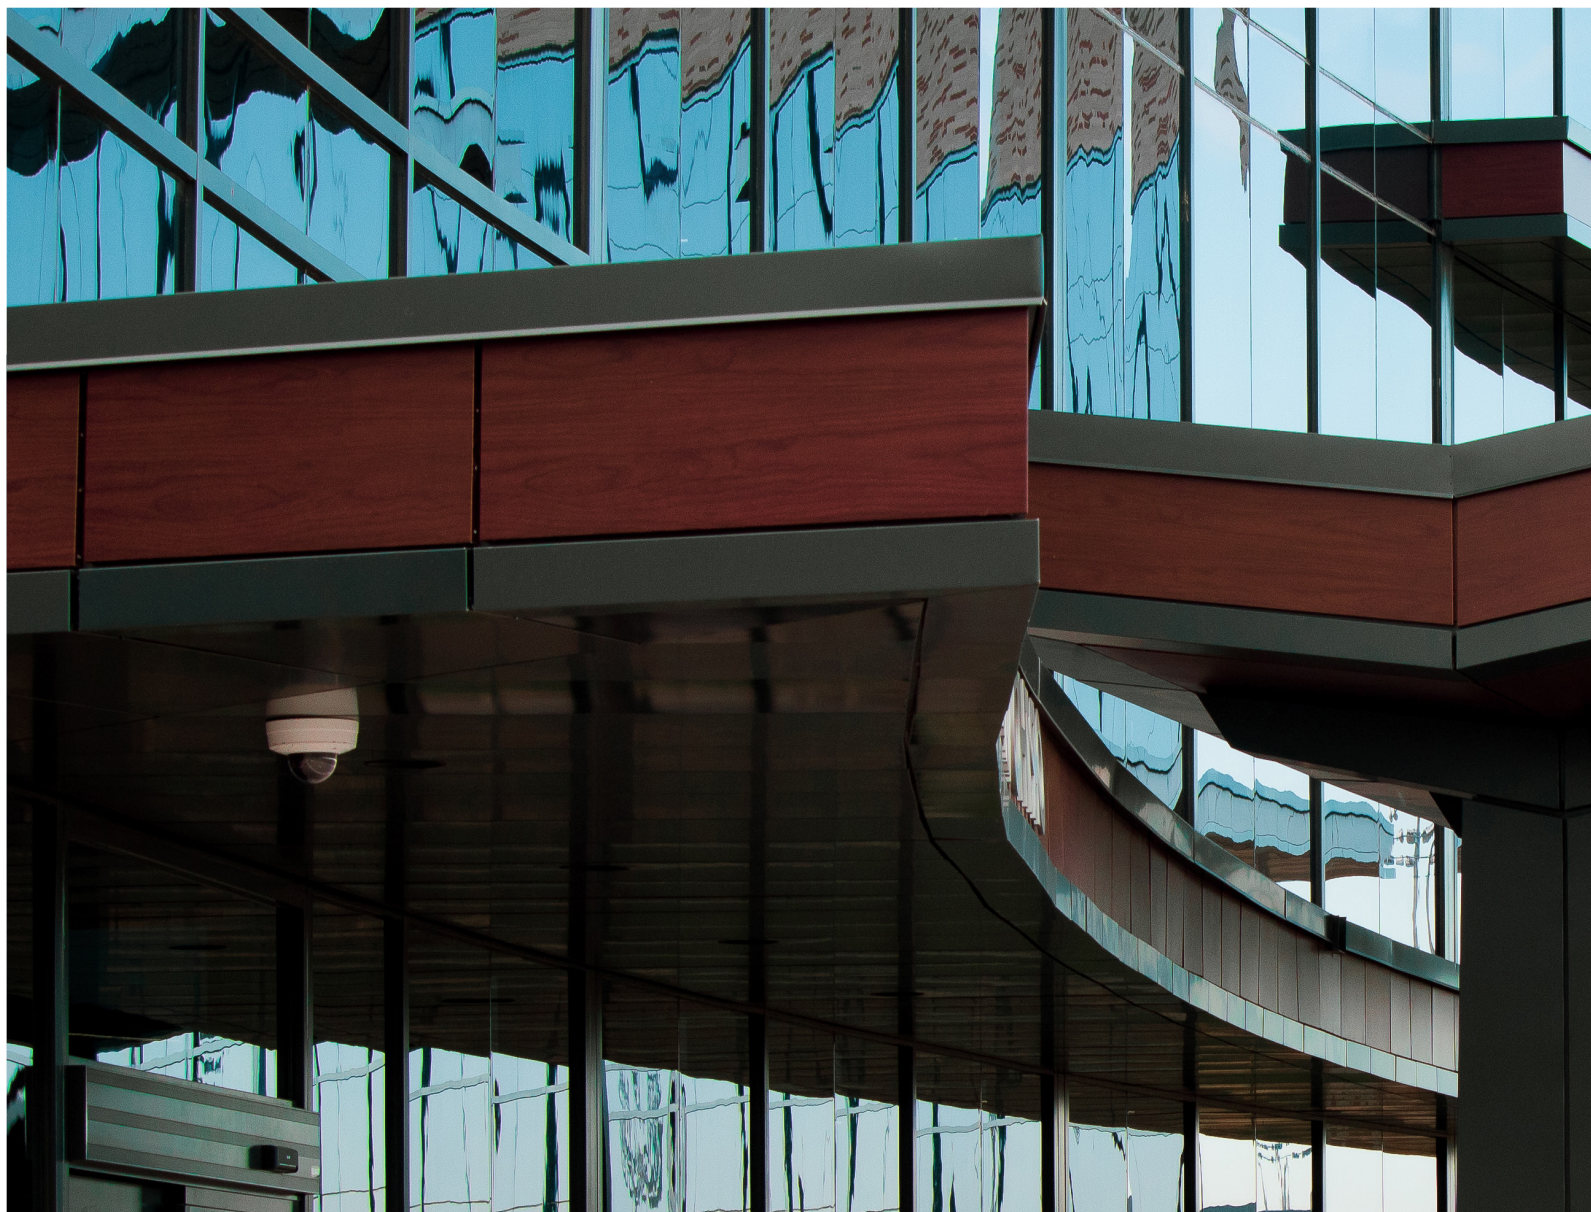

IN ADDITION

Western can assist with many custom metal projects such as awnings, canopies, special gutter sizes, skylights, and unit screens. We can also fabricate and install interior work, such as lobby and reception areas, accent walls, and elevator renovations. Plus much, much more!

"The Sheet Metal team at Western Specialty Contractors has been great to work with across multiple complex projects. Quality installations coupled with their willingness and ability to provide a collaborative approach to the construction process really sets them apart from others as a top tier trade partner."
